QUANTITY OF TREES

RECOMMENDED TREE AND SHRUB SPACING FOR SHELTERBELTS

Deciduous shrubs – at least 1.0 m (3 ft.) apart

Deciduous trees –at least 2.5 m (8 ft.) apart

Coniferous trees – at least 3.5 m (12 ft.) apart

TREE QUANTITY CALCULATOR EXAMPLE

Distance of planting (m/ft) divided by selected species spacing equals total trees required
 1000 m ÷ 2.5 m (Green Ash) = 400 trees

Deciduous SHRUBS	Description	Cost per Bundle*	# of Bundles	TOTAL
Villosa Lilac	A non-suckering medium shrub. Best growth occurs on moist, medium textured soils. Clusters of rosy-lilac to white flowers appear in mid to late June. Can reach a height of 12-14 ft.	\$ 32.50		
Caragana	Very hardy, medium to tall, upright shrub, which can reach 12 to 14 feet in height on favorable sites. Tolerant of dry soils and high pH. Yellow flowers followed by seed bearing pods.	\$ 31.00		
Dogwood	Medium sized, multi-stemmed shrub that may reach up to 6-8 ft in height. Prefers moist soils. White flower clusters appear in early June, followed by small, non-edible white berries.	\$ 31.00		
Saskatoon	Small, hardy shrub that may reach a height of 4-10ft. White blossoms appear in early spring, in late summer it produces delicious fruit and in fall its leaves turn pale to deep scarlet	\$ 31.00		
Sea Buckthorn	Thick, thorny, medium to tall shrub that may reach 12-16 ft in height. Tolerant of dry soils and salinity. The fruit, forms in clusters along the stems, and are ripe when orange in late August to early September	\$ 25.00		

All shrub species come in bundles of 25 trees, and range in size from 12"-18"

Deciduous TREES	Description	Cost per Bundle**	# of Bundles	TOTAL
Bur Oak	Medium to large, adaptable, long-lived tree with a wide, spreading crown which may reach a height of 40-60 feet on favorable sites. Produces acorns which are utilized by a wide variety of wildlife.	\$ 28.75		
Golden Willow	Moisture loving, large spreading tree. May reach up to 40-50 ft when mature. Young stems are a bright yellow. The fastest growing willow species.	\$ 26.75		

Green Ash	Medium to large straight trunked tree reaching 35 to 50 ft in height. Tolerant of wet or dry soil conditions, but requires full sun and is not shade tolerant.	\$ 25.00		
Hybrid Poplar	As yet unnamed superior clones from the populus testing program at the ARS Northern Great Plains Research Laboratory at Mandan, ND. Selected for insect and disease resistance, growth and hardiness.	\$ 26.75		
MB Maple	Native tree species found throughout southern Manitoba and Saskatchewan. May reach a height of 40-45 ft. Adapted to a wide range of growing conditions.	\$ 29.75		
Hybrid Poplar Cuttings	8" - 10" stick with no roots. Fast growing, hardy, with a spread of 8-10 ft. Selected for cold & drought tolerance and disease & pest resistance. (Bundles of 25)	Call for Pricing		
Acute Willow Cuttings	8" - 10" stick with no roots. Medium sized, multi-stemmed tree that performs best on moist, well-drained sites. (Bundles of 25)	Call for Pricing		

****All rooted stock will be in bundles of 25, and range in size from 12"-18"****

Coniferous TREES	Description	Cost per Bundle*	# of Bundles	TOTAL
Ponderosa Pine	A large tree with a straight trunk & wide, irregularly cylindrical crown. Can grow up to 35 m (115 ft) tall. It is a hard, wind firm tree with a wide-spreading root system. Shade intolerant, prefers moist, well drained loam soils, but will tolerate sandy soils as well as saline and alkaline soils.	\$ 36.50		
Colorado Spruce	A hardy, drought resistant conifer with a pyramid shape. Requires full sunlight and prefers moist, well – drained sandy and loam soils. Protection is required during establishment. Needles are a dark green/blue green colour.	\$ 39.25		
White Spruce	A medium tree, very dense and pyramidal when young. Can grow up to 60 ft in height. It grows best on moist loam soils and requires full sunlight.	\$ 39.25		

All conifers will be in bundles of 25, and range from 10"-24"
